

Little Plover River Habitat Improvement Work Days

Join us on a weekend of restoring fish and wildlife habitat along the Little Plover River. You'll be reconnecting wetlands and floodplains, removing invasive shrubs, and returning the river channel to a more natural form. These work days are a part of a larger, watershed-based effort to improve the health of the river and surrounding community. When you come out and help with this important work, you'll also learn about many other exciting things happening in the Little Plover River watershed and how you can get more involved.

LUNCH PROVIDED!

Saturday April 25, 2020 and
Sunday April 26, 2020
9am-3pm

Location:

WDNR Little Plover River Fisheries Area

[Google Maps Link](#)

4107 County Hwy R, Plover, WI 54482
Park in lot near out-buildings
