## Report Issues with Streetlights

The street lights in the Village limits are the responsibility of the Village. If you notice a street light out, make a note of the exact location and the "pole number" which is designated on a tag on the pole and call 715-345-5257 or 715-345-5250 to report the outage.

Your attention to neighborhood safety is much appreciated. To report a streetlight that is out or is malfunctioning (such as blinking on and off constantly or staying on during the day), please collect the following information and then report the issue.

1. Collect the pole number and name of the street where the light is located
2. Identify the home or business address nearest to the pole
3. Note the issue that you are reporting - out, on all day, on/off issues, LED glare, pole down, etc.
4. Your name, email and/or phone for follow up and status updates
